

PASSION doesn't come from a can. It's not in aisle 6 of the local mega-mart. And you can't order it from some late night infomercial. It comes from deep inside those who truly love to ride.

It's in this **PASSION** we created the **FOUR CORNERSTONES** of a great riding experience.

So for those who want stables of galloping horsepower. Or to hear the crack of a sonic boom. Or to blast through a mountain cornice. Or to just cruise in the lap of luxury. Whatever it is, we've got it.

From the World's Fastest Snowmobiles™ to Industry-Leading Horsepower. From Expert-Grade Mountain sleds to our Body-Saving Ride technology – only Arctic Cat gives you the ultimate riding experience.

2011 ARCTICWEAR & ACCESSORIES

Trailhead parking-lot laughter. The hum of a throttle-induced acceleration into that white world of awesome. A healthy dose of hooting, hollering and heck yeahs when someone goes big, sticks the line or just climbs off their sled visibly psyched about the ride. That's the stoke of winter where we all call home, where the exact size of the wickedly huge smiles spanning ear-to-ear directly correlates with the amount of snow that's fallen the previous evening.

It also says a lot about our shared passion for the ride and the fantastic places riding takes your mind, body and soul — a powerful reason you'll find the latest clothing designs, fashions and product technologies within these pages. Whether it's to surround you in warm, dry, daylong comfort or help you trick out your sled with gear and accessories that make that sled distinctly yours, our insistence on forever pushing the technology flat-out makes the passion stronger year in, year out.

It's time to ride, friends, because that's what we all do best together.

Start warm, end warm. That's the mantra behind our phenomenally versatile Flex Liner System. With four different variations of heat — 100 or 200 grams Thinsulate™ Insulation, Fleece or Softshell — you can choose your personal level of warmth, comfort and wind protection, then seamlessly zip it into Arctic Cat® Flex System coats and jackets for an extra layer of cold-weather protection. As a bonus, the Flex Zip-Out Liners double as great light spring or fall jackets.

Newsflash: Flattery will get you surprisingly far, so flattery was priority numero uno when designing the Women's Arcticwear® lineup. Here you'll find styles designed fit a woman's curves, which means those tired, old boxy and overly baggy styles were ignored in favor of designs that hug, accent and heat up in a markedly cool Catgirl way.

****Arm yourself against the cold with this handy comfort rating scale, a highly scientific, lab- and field-tested rating system developed by the footwear industry to help advise you on which boots to wear when you step-out into that winter land of wonder.**

Note: As with any rating system, this is more of a suggestion than a rule and should only be used as a comparison guideline, NOT an actual temperature guide. Variables affecting cold-weather protection include circulation, level of activity, presence of moisture, body temperature, windchill and outerwear.

TEAM ARCTIC BURNOUT TEE (PAGE 75)

Break out the thermometer and watch it explode when you take the temperature of these hot styles. Designed with the wearer in mind, our snug, more modern Junior styles rock a slimmer cut through the body with shorter sleeves and bottom hem, while the Women's lineup is all about your proportions; not too big, never too little, with a waist that's neither too high nor too low. In a word, they're perfect. And hot.

Behold the realm of the true Cat-obsessed: The Custom Accessories section, where the tinkers reign supreme, fiddling with this part here, adding that sweet new performance piece there, and then retweaking the entire program into all hours of the night. This is where sleds are turned into statements, where individual styles are brought forth, and at the end of the day, where Cat riders leave lesser sleds in the snowbank.

STUD PLACEMENT

- DO NOT USE STUDS THAT ARE LONGER THAN RECOMMENDED
- DO NOT PLACE STUDS IN LINE WITH THE HEAT EXCHANGER OR TUNNEL PROTECTOR STRIP AND FACTOR IN THE AMOUNT OF SUSPENSION TRAVEL TO AVOID TUNNEL DAMAGE
- STUDS MUST NOT EXTEND MORE THAN 3/8 IN. BEYOND THE RUBBER TRACK LUGS
- VERIFY ADEQUATE CLEARANCE BETWEEN THE TRACK, TUNNEL AND HEAT EXCHANGER TO AVOID SERIOUS DAMAGE
- CONFIRM THAT YOUR MACHINE HAS ADEQUATE TUNNEL PROTECTION BEFORE INSTALLING STUDS
- USE ONLY ARCTIC CAT-APPROVED STUD TEMPLATES SHOWN ON PAGE 129
- THE LENGTH OF CARBIDE AND NUMBER OF STUDS MUST COORDINATE TO RESULT IN BALANCED HANDLING AND PROPER CONTROL

CAUTION

- TO PROTECT THE TUNNEL FROM POSSIBLE DAMAGE FROM THE STUDS, IT IS RECOMMENDED THAT A TUNNEL PROTECTOR KIT BE INSTALLED ON THOSE MODELS NOT SO EQUIPPED
- A SHORT SNOWFLAP IS REQUIRED WHEN INSTALLING STUDS ON '07-'09 F SERIES, Z1; '09-'11 CROSSFIRE AND CFR

MAXIMIZE HANDLING & CONTROL

STEERING CONTROL

THE LENGTH OF THE TURNING CARBIDE (CARBIDE INSERTED DIRECTLY UNDER THE STEERING SPINDLE) IS THE DETERMINING FACTOR ON STEERING CONTROL. THE LONGER THE TURNING CARBIDE, THE MORE POSITIVE TURNING BECOMES. TOO FEW STUDS WITH LONG TURNING CARBIDES CAN RESULT IN THE SITUATION SHOWN IN ILLUSTRATION 1 BELOW.

TRACTION CONTROL

THE QUANTITY AND TYPES OF STUDS INSERTED THROUGH THE TRACK CAN HAVE SEVERAL EFFECTS. IF INSTALLED IMPROPERLY, TRACK AND/OR STUD DAMAGE CAN RESULT. IF THE PUSHING FORCE FROM AN EXCESSIVE NUMBER OF STUDS EXCEEDS THE ABILITY OF THE STEERING TO CONTROL THE FORCE, THE EFFECT COULD BE LIKE THAT IN ILLUSTRATION 2. IN THIS CASE, THE STUDS TEND TO "PUSH" THE SKIS IN A STRAIGHT LINE.

1. BACK END LOOSE. TOO MUCH CARBIDE, NOT ENOUGH STEERING CONTROL.

2. FRONT END PUSHES. WEAK STEERING FROM WORN WEARBARS, TURNING CARBIDES TOO SHORT OR OVERSTUDDING ON TRACK.

3. STEERING CONTROL AND STUD QUANTITY ARE IN BALANCE FOR PROPER SETUP.

TUNE YOUR SLED'S HANDLING TO YOUR RIDING STYLE

DETERMINING THE PROPER TRACTION AND CONTROL IS SIMPLE. WHAT'S YOUR RIDING STYLE: A CONSERVATIVE TRAIL RIDER OR A PERFORMANCE TRAIL RIDER? LOOK AT THE CHART BELOW. FIND THE LINE WITH THE HORSEPOWER OF YOUR SLED. LOOK UNDER YOUR RIDING CATEGORY. HERE YOU WILL DISCOVER THE NUMBER OF STUDS AND THE LENGTH OF THE CARBIDE WEARBAR YOU SHOULD USE. THIS IS A BASELINE GUIDE FOR STUD AND WEARBAR SELECTION.

SEE YOUR DEALER FOR SPECIFIC MODEL APPLICATIONS.

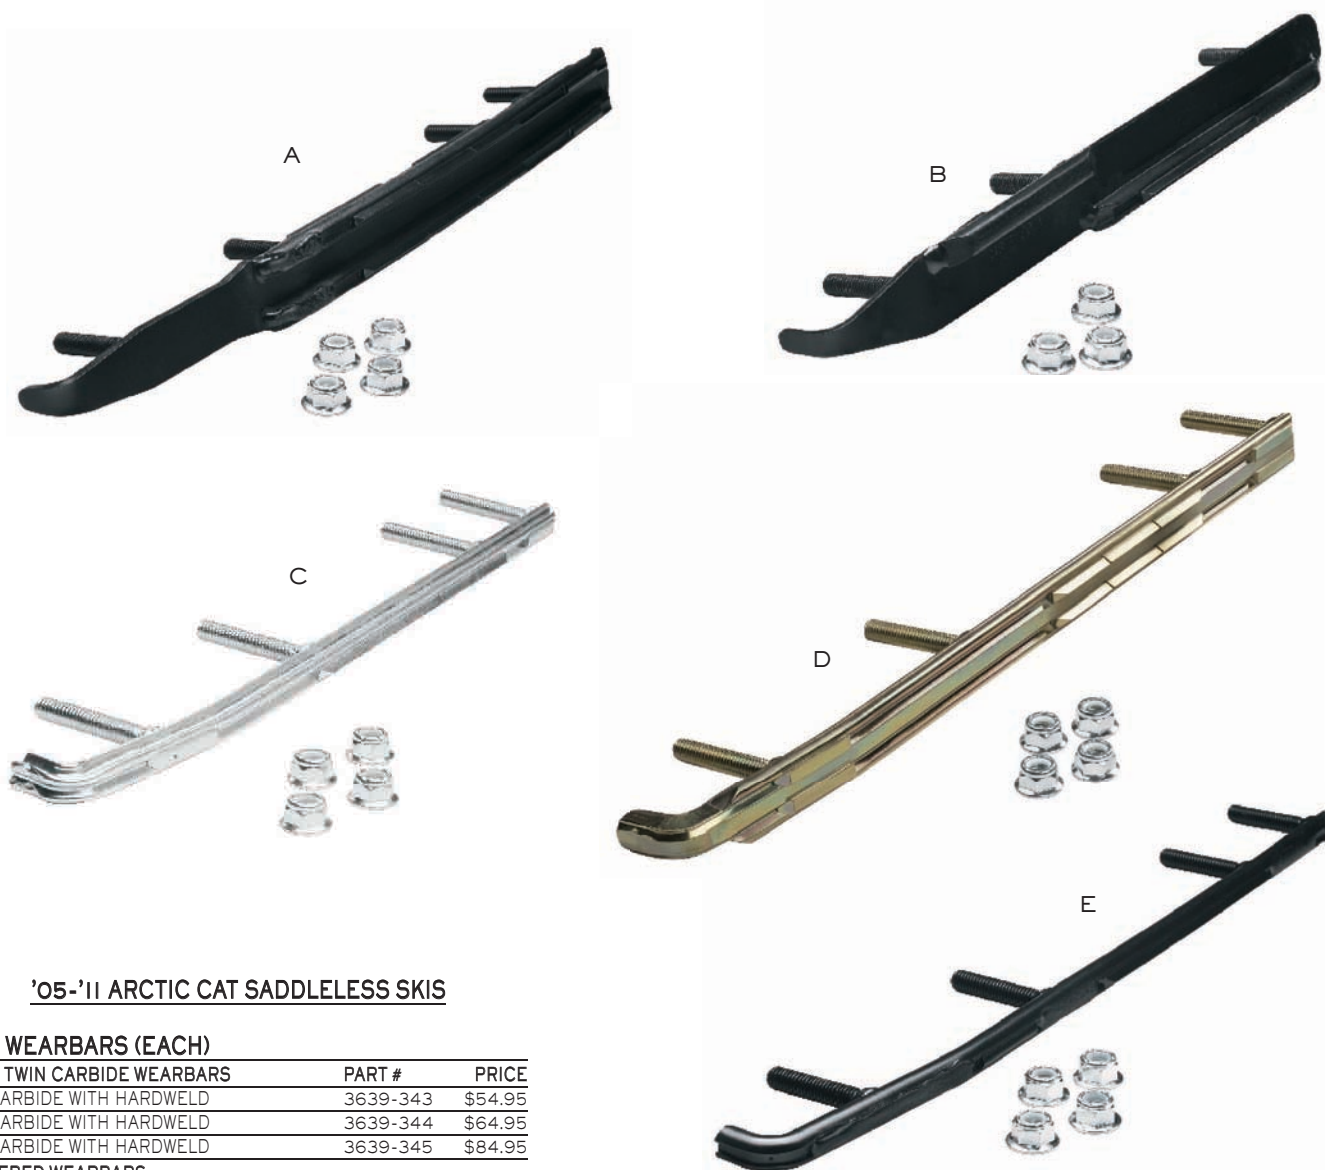

| SLED | STUD QUANTITY/ INCHES OF TURNING CARBIDE | | PERFORMANCE |
|------------|---|-------------|-------------|
| | TRAIL | PERFORMANCE | |
| 50-75 HP | 48/4 IN. | 48/6 IN. | 48/6 IN. |
| 75-125 HP | 102/6 IN. | 102/6 IN. | 153/8 IN. |
| 125-150 HP | 153/8 IN. | 153/8 IN. | 153/10 IN. |
| 150-170 HP | 153/8 IN. | 153/8 IN. | 153/10 IN. |

FOR STUD PLACEMENT, USE ONLY ARCTIC CAT-APPROVED STUD TEMPLATES SHOWN ON PAGE 129.

ARCTIC CAT TRACTION PRODUCTS ARE AVAILABLE IN PACKAGE QUANTITIES OF 102 AND 153. THESE QUANTITIES WILL GIVE YOU THE BEST COMBINATIONS FOR BOTH 121-IN. AND 128-IN. TRACKS.
